

EXTENDED WARRANTY FOR TRUCKS

We offer three levels of coverage:

WARRANTY POWER:

Coverage for the major drive train components. Up to 3 years/50,000 miles from date of first registration.

WARRANTY PLUS:

Coverage for the major drive train components and the major hydraulic and electronic components. Up to 5 years/100,000 miles from date of first registration.

WARRANTY TOTAL:

The most comprehensive coverage with additional protection for the chassis/main frame and electrical components. Up to 7 years/200,000 miles from date of first registration.

With manufacturer factory warranties on new trucks typically expiring after 12 months, truck owners run the risk of significant financial loss over time in the event of a breakdown.

EPG Global's extended warranty is available on most types of used trucks and is available at a fraction of the cost of common repairs, saving businesses time and money should something go wrong. Our Truck warranty programme covers the cost of getting things up and running again as quickly as possible and handles the end-to-end claims process, alleviating some of the pressure and allowing truck owners to get back to doing what they do best.

TYPES OF VEHICLES WE COVER:

- CDV/Pick-ups
- Panel vans
- Flatbeds
- Tippers
- Box
- Single unit non articulated
- Large class tractors
